

Premium Whey Protein

A superior grade, 100% biologically active whey protein powder, made from the milk of grass-fed, chemical-free cows, uniquely processed to maintain its full immune enhancing and regenerative properties.

- **Premium Whey Protein** is a superior non-denatured whey powder processed by a proprietary low-heat method that retains its full biological activity
- Unlike almost all other whey powders, it is *not* a by-product of cheese manufacture, nor produced by inferior hydrolyzation or ion exchange processes
- **Premium Whey Protein** is rich in immunoglobulins (2.4 grams per scoop), special proteins with potent immune enhancing properties
- Also rich in lactoferrin (500 mg per scoop), an iron-modulating protein with anti-bacterial properties that helps deliver iron to healthy cells while preventing it from being used by pathogens, yeast, or tumor cells
- **Premium Whey Protein** also contains covalent bonded cysteine, the rate-limiting nutritional precursor to glutathione (the body's primary endogenous antioxidant), as well as serum albumin and natural growth factors
- An excellent source of branched chain amino acids (BCAAs), essential for proper protein synthesis, DNA repair, and muscle building

 ** Daily Value not established

Ingredients: Whey protein concentrate, natural vanilla nut flavor.

Other Features:

- **Premium Whey Protein** is made from the milk of cows that graze on natural, chemical-free grass pastures, conditions known to produce a superior quality milk, rich in CLA and essential fatty acids
- These cows are *never* given bovine growth hormones, antibiotics, genetically modified organisms (GMO), animal by-products, pesticides or chemicals of any kind
- **Premium Whey Protein** is usually well tolerated by individuals with lactose intolerance or dairy allergies; however dairy allergic individuals should start with a small dose
- Not recommended during pregnancy, when lactoferrin production is naturally reduced

Premium Whey Protein (450 grams)
